Dear future 8th grader,

We hope you had a wonderful 7th grade year, and welcome to your **algebra regents' class!**

We have prepared a summer math packet to help you get ready for 8th grade **algebra**. It covers many of the math topics that you learned in class this past school year, which we will be building on next year. Although everything in the packet is “review” (meaning you’ve already DONE this work), you can use the reference sheets posted online and the attached videos to help guide you, just in case you have forgotten how to do the problems.

The summer math packet is posted on our school webpage (229k.org). Please show all of your work for the problems in the packet. The completed packet is due the first week back to school. It will count as your first grade of the new school year. If you are unable to print out the packet, please complete the work on looseleaf.
